

***i-Ready Diagnostic* and Georgia Milestones Assessment System Linking Study Overview**

Curriculum Associates, in partnership with the Educational Research Institute of America (ERIA), conducted a large-scale study on the relationship between *i-Ready Diagnostic* and the 2017 Georgia Milestones. The research found a high correlation between *i-Ready Diagnostic* and the Georgia Milestones. *i-Ready* was also shown to accurately predict end-of-year proficiency rates.

About the Research

ERIA collected data from approximately 37,000 students across five districts in Georgia. The research includes the following analyses:

- Correlations between Georgia Milestones and *i-Ready Diagnostic*
- Analysis of *i-Ready Diagnostic* placements and student proficiency, as measured by Georgia Milestones
- Creation of a proficiency prediction model using 2016–2017 data that allows educators to use *i-Ready Diagnostic* data to predict end-of-year proficiency on their state assessment

Correlation Between *i-Ready Diagnostic* and Georgia Milestones

The research study found a strong correlation between *i-Ready Diagnostic* scores and scores on the Georgia Milestones assessments administered in 2017.

Correlations Between the Spring *i-Ready Diagnostic* and the 2017 Georgia Milestones

Why Correlations Matter

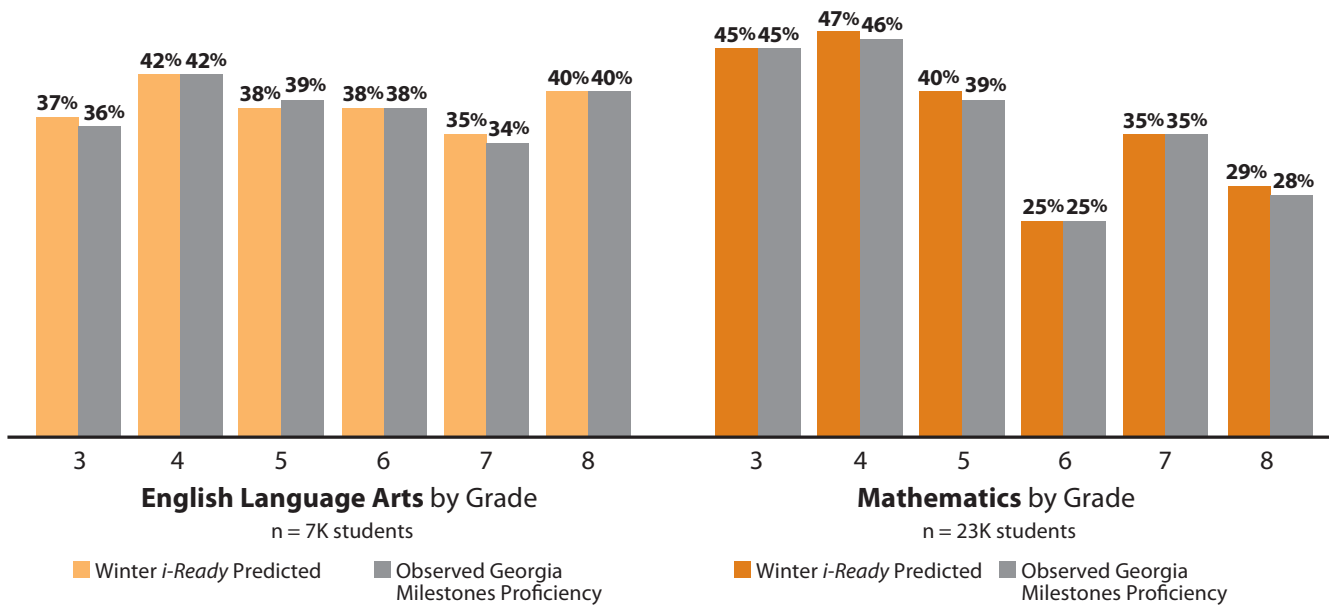

Correlations are one of the most commonly used and widely accepted forms of validity evidence. Correlations demonstrate that when students score high on one assessment, they also tend to score high on the other, and similarly, when students score low on one assessment, they also tend to score low on the other. A high correlation between two assessments provides evidence that the two assessments are measuring similar constructs.

Predicted Proficiency Rates

Based on strong validity evidence and the needs of educators using *i-Ready*, the Curriculum Associates team developed a prediction model for Georgia Milestones assessment results using logistic regression analysis. **The model proved to be highly accurate in forecasting aggregate proficiency rates across grades and subjects.**

Comparison of Predicted and Observed Proficiency Rates for 2017 Georgia Milestones

i-Ready's predicted proficiency rates were remarkably consistent with observed (actual) Georgia Milestones proficiency rates—often within 1% of observed proficiency for the sample.

Note: The charts above use assessment scores from more than 7,000 winter *i-Ready Reading Diagnostics* and more than 23,000 winter *i-Ready Mathematics Diagnostics* and students' corresponding Georgia Milestones scores; similar accuracy was observed across fall, winter, and spring testing scores.

Summary of Research Findings

Findings from the research demonstrate that:

- *i-Ready Diagnostic* scores are strongly correlated with the scores on Georgia Milestones.
- *i-Ready Diagnostic* scores can be used to accurately predict and classify students' proficiency on the 2017 Georgia Milestones.
