Understanding Key Terms

Placement Levels are used to guide instruction in the classroom. Placement Levels are based on Elijah's level of performance overall and on each subtest, and they describe the optimum instruction level.

The four possible placement levels are:

- Above Grade Level
- At Grade Level
- Approaching Grade Level
- Needs Improvement

Scale Scores provide a single, consistent way to measure growth across grade levels and domains. You can use a scale score to compare a student's growth on different administrations of the i-Ready Diagnostic.

National Norms are percentiles, comparing each student's performance with that of a nationally representative sample of students in the same grade level who took the test at the same time of year. For example, a student who has a norm of 60% on the test scored better than 60% of a nationally representative group of students who took the test.

Términos clave

Los niveles de grado se utilizan para guiar la instrucción en la clase. Los niveles de grado están basados en el desempeño general de Danielle así como en cada sub-prueba, los cuales describen el nivel óptimo de instrucción.

Hay cuatro niveles de grado:

- Por encima del nivel de su grado
- A nivel de su grado
- En progreso al nivel de su grado
- Necesita mejorar

La escala de calificaciones ofrece una manera única y uniforme de medir el crecimiento a través de los grados escolares y dominios. La escala de calificaciones se puede utilizar para comparar el crecimiento del estudiante a través de distintas evaluaciones de i-Ready Diagnostic and i-Ready Instruction.

Normas nacionales son percentiles que comparan el desempeño de cada estudiante con el de una muestra representativa nacional de estudiantes del mismo nivel de grado que tomaron la prueba en el mismo momento del año. Por ejemplo, un estudiante con una norma de 60% en la prueba tuvo un resultado mejor que el 60% de un grupo representativo a nivel nacional de los estudiantes que tomaron la prueba.
