

Scope and Sequence

The scope and sequence below shows the progression of specific concepts within and across domains of the Common Core State Standards (CCSS) for Grades K–8 in *i-Ready Classroom Mathematics*. As students move from elementary grades through middle school grades, the domains of the CCSS change as appropriate to the grade level, so domains of related content are grouped together accordingly. Because of the interconnectedness of mathematics content, some domains appear in multiple sections of the scope and sequence.

For each group of domains, the table lists the CCSS standard codes that address the concept described in the first column by grade. The table below lists the CCSS standard codes and lessons from *i-Ready Classroom Mathematics* (in blue) in which these standards are the focus of instruction.

Educators can use this table with *i-Ready Classroom Mathematics* to recognize the vertical alignment of standards and progression of concepts as students progress through the grades.
